Address: 28-9-775, Venkateshwara Puram, Main Road, Nellore, Andhra Pradesh, India – 524005

Professional Summary

I am an experienced **Full-Stack Developer** specializing in **React, Node.js, JavaScript/TypeScript**, and strong expertise in **PostgreSQL** and **MongoDB**. I have a deep understanding of building scalable **web applications** and **microservices**, deploying cloud-based solutions using **Azure App Services**, and working with **CI/CD** tools such as **Jenkins** and **Azure DevOps**. Additionally, I work in containerized environments using **Docker**, ensuring efficiency and reliability in production deployments. I am committed to clean architecture, performance optimization, and delivering high-quality software solutions.

Experience

Infosys, Senior Systems Associate, Chennai

May 2022 – Present

Projects Handled

1. Elevators Monitoring and Management Portal

Jan 2024 – Present

- Worked on an application using **Nests**, taking ownership of user **authentication** implementation with Azure AD OAuth 2.0 to efficiently manage user authentication.
- Built scalable backend services using **Node.js** and **Express.js**, **Nests** and **MongoDB** designing **RESTful APIs** for seamless integration with frontend applications.
- Developed dynamic and responsive web applications using **React.js**, optimizing performance and leveraging **Redux** and **Context API** for efficient state management.
- Utilized **CI/CD** pipelines with **Jenkins** and **Azure DevOps** to streamline **build, test, and deployment** processes, ensuring efficient software delivery.
- Improved application performance and reliability by **troubleshooting, debugging, and refactoring** critical components, collaborating with **cross-functional** teams to resolve production issues effectively.
- Maintained code quality and scalability by following best practices such as **clean architecture, modular design, and test-driven development (TDD)** to enhance system resilience and longevity.
- Integrated PostgreSQL and MongoDB for data persistence, performing efficient CRUD operations using ORMs like TypeORM and Mongoose.
- Developed responsive **UI components** using **React.js**, integrating them with REST APIs to deliver dynamic and interactive user experiences.
- Implemented unit testing with **Jest, Mocha, and Chai**, ensuring high test coverage and code reliability.
- Followed Agile SDLC methodologies within my team, contributing to sprint planning, backlog refinement, and retrospectives to support project execution.
- Utilized **Git** for **version control**, ensuring efficient **collaboration, code management**, and streamlined development workflows.

2. Customer Service Portal

May 2022 – December 2023

- Completed intensive training in **Node.js** and backend architecture, focusing on **JavaScript, TypeScript**, and asynchronous programming concepts.
- Built and consumed **RESTful APIs** using **Node.js** and **Express.js**, implementing core **business logic, request validation, and centralized error handling**.
- Integrated **PostgreSQL** and **MongoDB** for data persistence, performing efficient **CRUD** operations using ORMs like **TypeORM** and **Mongoose**.
- Tested APIs with **Postman** to validate endpoints, analyze response data, and ensure correct request flows throughout the development lifecycle.
- Managed component state using **React Hooks** and **Context API**, enabling **modular design** and improved maintainability.
- Optimized application performance through efficient **state management, lazy loading, and component reusability**.
- Utilized **Docker** for containerization, ensuring consistency across development, testing, and production environments.

More Projects

Safe Keep JS - Secure Vault Storage

2025

Safe Keep JS is a secure password and data management system built to help users store sensitive information such as passwords, card details, wallet credentials, and personal notes. The system uses modern encryption techniques to ensure data privacy.

Case Study: <https://www.charanteja.com/work/safekeep-js>

Good Will Foundation - Portfolio Website for Osmania Medical College

2025

A fully responsive, accessible, and dynamic portfolio website built for the Good Will Foundation at Osmania Medical College. Created as a non-profit initiative to showcase the organization's mission, supporters, activities, and donation efforts.

Case Study: <https://www.charanteja.com/work/good-will-foundation-omc>

TypeORM Query Utils - Dynamic Utilities for TypeORM Repositories

2024

TypeORM Query Utils is a lightweight, production-ready NPM package offering dynamic query-building utilities for TypeORM repositories, including dynamic filtering, sorting.

Case Study: <https://www.charanteja.com/work/typeorm-query-utils>

React4Movies | Movie Bunkers - MERN Stack Movie Management App

2023

React4Movies | Movie Bunkers is a full-stack movie collection and discovery platform built as a MERN stack proof-of-concept. It integrates TMDB data, user roles, and streaming availability into a responsive and filterable interface.

Case Study: <https://www.charanteja.com/work/react4moives-moviebunkers-mern-stack>

Form-filling Entry Automation Bot — UiPath RPA Automation

2022

This UiPath RE Framework-based bot automates a high-volume repetitive task like form filling, significantly reducing manual effort and improving accuracy. Built as a practical RPA solution during my MBA part-time role.

Case Study: <https://www.charanteja.com/work/voltas-nsa-entry-automation-uipath>

Education

Master of Business Administration (MBA)

2022

Kirshna Chaithanya institute of Management | Vikrama Simhapuri University | Nellore AP.

Bachelor of Computer Science (B.sc)

2019

Kirshna Chaithanya Degree & P.G College | Vikrama Simhapuri University | Nellore AP.

Skills & abilities

Programming Languages: JavaScript, TypeScript

Frontend: React.js, Redux Toolkit, HTML, CSS, Ant Design, Next.js

Backend: Node.js, Express.js, Nest JS

Database: PostgreSQL, MongoDB

DevOps & Tools: Docker, Jenkins, Azure DevOps, Git, Postman

Testing: Jest, Mocha, React Testing Library

Cloud: Azure

Version Control Systems: Git, GitHub

Certifications

[GitHub Foundations Certification](#)

March 2025

[Microsoft Certified: Azure Fundamentals](#)

December 2024

[SI Associate Certification \(MongoDB\)](#)

April 2024
